

PROPOSAL

Architectural Video

3D Animation · 60 seconds · 4K · Premium tier

CLIENT

Netflix

PROJECT

Los Gatos Building — California, USA

DATE

06 / 01 / 2026

VALID FOR

30 days

THE CONCEPT

A ~60-second video in which the current state of the site transforms before the viewer into the finished project. We start from real footage of the location, render the project frame by frame matched to the exact camera perspective (camera matching), enhance that render with AI post-production for hyper-realistic integration, and blend it into the real footage through generative transitions. The building is rendered faithfully to the plans — not hallucinated by AI —; AI elevates the realism and merges project and reality into a single living shot.

METHODOLOGY

- | | |
|--------------------------|--|
| 1 · Anchoring in reality | Key-frame extraction from the site video to lock perspective, lens and lighting for each segment. |
| 2 · Project render | The project rendered frame by frame, aligned to the real camera (camera matching), faithful to the plans. |
| 3 · AI post-production | Photorealistic integration of the render — shadows, reflections, atmosphere — blended with real footage texture. |
| 4 · Blend with reality | Generative transitions synthesizing in-between frames: the existing site transforms into the project seamlessly. |
| 5 · Final finishing | Assembly, unified color grading, 4K upscaling, temporal coherence and sound design + music. |

SCOPE & BUDGET

ITEM	DETAIL	USD
Pre-production	Script, storyboard and definition of the camera move and transformation points	\$700
Camera matching	Key-frame extraction and alignment of the virtual camera with the real footage	\$1,200
Project render	The project rendered frame by frame, faithful to the 2D plans	\$2,200
AI post-production	Photorealistic integration of the render and blending with the real footage texture	\$1,400
AI blend & transition	Generative transitions: synthesis of in-between frames from reality to project	\$1,900
4K render & coherence	~60 seconds, 4K upscaling and temporal coherence stabilization	\$1,100
Final finishing	Unified color grading, sound design and licensed music	\$1,200
Total · 2 revision rounds included		\$9,700

TERMS

- Confidentiality:**

 - All project materials are strictly confidential; NDA available on request. Once the client publicly releases the video, Imabox may use it for portfolio purposes.

Ownership:

 - The final video and usage rights transfer to the client upon full payment.

Payment:

 - To be agreed between the parties.
- Timeline:**

 - 4 weeks from delivery of the 2D plans and site video / photos.

Revisions:

 - 2 rounds included; scope changes quoted separately.

Deliverable & currency:

 - One horizontal 4K master (MP4 + ProRes), priced in USD.

This proposal is valid for 30 days from the date of issue. Amounts do not include taxes applicable per jurisdiction.
